PROJECTS

Yump | *(React, Redux, Ruby on Rails, JavaScript, PostgresQL, HTML, CSS, Webpack, Google Maps API, Amazon Web Services (AWS))*   **live** | **github**

Yump, a Yelp clone, allows users to search restaurants by category, and leave reviews and ratings for each business.

- Built a secure user authentication system, utilizing Bcrypt to hash and salt passwords, strengthening protection of user data.
- Streamlined user experience when managing form data, allowing users to optionally submit form changes.
- Implemented Google Maps API to render markers representing business' location according to user search results.
- Designed a search feature using redux.

PharmAssist | *(React, Redux, JavaScript, MongoDB, Express.js, Node.js, HTML, CSS, Google Maps API)*   **live** | **github**

PharmAssist provides users with an individualized experience in maintaining their medication regimen.

- Implemented Google Maps API and Places to query for nearby locations and render markers on the map.
- Employed Git workflow to effectively collaborate with 3 other team members, separating features into different branches and increasing productivity output and workflow.
- Employed SCSS Flexbox and z-index for an appealing and responsive layout.

Invasion | *(JavaScript, HTML, CSS)*   **live** | **github**

Invasion is a game inspired by the classic "Whack-a-mole" game.

- Utilized setInterval() and setTimeout functions to generate a countdown and render HTML elements based on the countdown.
- Leveraged Javascript's asynchronicity to create an interactive and responsive game, via DOM manipulations and the use of event handlers and listeners.
